

Energy videos

Videos and information about energy, created by the Department for the Economy and the Utility Regulator.

In partnership with the [Department for the Economy](#) and the [Utility Regulator](#), we've created a number of information videos to provide you with energy advice and support. The videos outline practical steps you can take to help ease the impact of rising energy prices.

Tips to reduce your household energy bills this winter

While energy efficiency alone will not stop our bills rising, there are small things we can do at home to make the energy we use go further.

-

Why are energy prices so high in Northern Ireland?

Unfortunately, energy prices have increased in Northern Ireland. This video explains why prices are so high in Northern Ireland at the moment.

-

Northern Ireland's Path to Net Zero

The Department for the Economy's Energy Strategy sets out how Northern Ireland will reduce the carbon we use to reach the target of net zero. This will make it more energy self sufficient to use our local natural resources to make renewable energy affordable for everyone
