

Corporate responsibility and sustainability

As Northern Ireland's statutory consumer body, what matters to you matters to us.

Our purpose is to protect and empower consumers in Northern Ireland and we are committed to doing this in a responsible and sustainable way.

How we work in a responsible and sustainable way

We take full ownership of the societal and environmental impact our business decisions have on the wider environment. We want to be exemplar in how we develop our people and adopt business practices that are ethical and environmentally sustainable.

We will learn from others, encourage staff to share skills and knowledge, and embed relevant policies and practices within the organisation and with our staff. This will ensure we actively contribute to wider society and minimise our environmental impact.

More information can be found in our **Corporate Social Responsibility policy**.
