

Active and sustainable travel

Advice and information on walking, cycling and multi-modal travel

Active and sustainable transport is not only good for the environment, but also good for physical and mental health. The Department for Infrastructure's [Planning for the Future of Transport](#) sets out a travel hierarchy which prioritises sustainable transport by:

- firstly providing for walking and wheeling,
- then providing for cycling,
- then providing for public transport,
- then providing for taxis and shared transport and goods vehicles, and
- finally, providing for private cars and motorcycles.

Some useful links to active and sustainable travel are set out below.
